

# Cuban Mojito

## Welcome to South Beach!

Nothing is better in the summer than the refreshing taste of an icy tall Mojito.

**Yield:** 1 Serving

### Ingredients:

- 2 teaspoons superfine sugar
- Small bunch of mint leaves (5 to 7 minimum)
- Crushed ice
- 2 shots of White Rum
- 2 tablespoons of fresh lime juice
- 1 (6 oz) bottle of club soda, chilled

Place sugar and the mint leaves in a highball glass; crush with a spoon. It's very important that you spend extra time to pulverize the mint leaves. Add Rum and crush the mint leaves further. Fill half the glass with crushed ice, add juice and mix the ingredients. Then top with club soda and more crushed ice until the glass is full. Garnish with additional mint leaves.
